MIXSON'S HIGH-GRADE SEEDS

For Truck Farmers and
Market Gardeners

W. H. Mixson Seed Co.

LARGEST WHOLESALE SEEDSMEN SOUTHEAST

Charleston, South Carolina

IT is for the benefit of the Truck Farmer and Market Gardener that this Catalog is primarily issued. These men invest heavily in the crops they produce, and the question of Seed is to them, therefore, of vital importance. No matter how ideal the preparation, or high grade the fertilizer, or how perfect the growing season or the condition of the market, all will go for naught if the proper seeds have not been used. Intelligent farmers know this, and it is to this class of farmers that Mixson's Seeds appeal.

Located as we are in the trucking section, coming into contact with many farmers from many sections of the South, we fully appreciate the needs and problems of the Truck Farmer, and it is our aim to give him service to which he can turn with dependence. Our Ferndale Trial Grounds afford us an opportunity to study these problems at first hand, and we are probably the only Seedsmen operating in the South a Trial Ground for truck crops.

And if they appeal to the Truck Farmer, the Home Gardener should also use them. It is true that he has not the investment of the farmer, and for this reason he is often prone to "take a chance", but this is absolutely unnecessary, when Mixson's Seeds are so easily secured.

About Prices—The quotations made herewith are the ruling prices when this Catalog goes to press, but it is manifestly impossible to name prices in December which will hold good through the season. In fact, they are all liable to change. If a reduction has taken place, we will make proper refund, and if there has been an advance, we will notify you. **If ordering at prices in this catalog, please so state in your order.**

About Shipping—Prices are f.o.b. Charleston, meaning that freight or express charges are to be paid by you on delivery. If you have no Agent at your shipping point, they must be included in your order, or we can ship to the nearest point where there is an Agent. Please state if you wish Express or Freight shipment, otherwise we will use our judgment. Seeds can also be sent by Parcel Post, and this amount must be included in your remittance.

Terms—Cash with order, but if you wish we will send C.O.D. by Express or Parcel Post or Sight Draft Bill of Lading attached through your bank by Freight, provided you send one-fourth of the amount of your order.

No Warranty—We give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds we sell, and will in no way be responsible for the crop.

Mixson's Vegetable Seeds are used by some of the most critical Truck Farmers in the South. There are none better to be had.

Mixson's Special Charleston Wakefield Cabbage

CABBAGE

We are one of the largest dealers in Cabbage Seed in the United States, and the supplying of selected strains to Truck Farmers is a specialty with us. All of the stocks listed below are offered with full confidence and can be used by the most critical trade. The varieties to which we attach our name and call "Special" are extra select stocks, the strains being of our own introduction, close breeding being done each year to insure the high standard. The other stocks are the same as are offered by other high grade seedsmen and will be found reliable.

Early Pointed and Round Heads

	Lb.	10 lbs.
Mixson's Speacial Charleston Wakefield —Early, regular in maturity and a big yielder. In the Charleston-Meggetts section this strain is planted in excess of any other. It is the result of close selection and we know of no better strain	\$3.00	\$27.50
Charleston Wakefield (Regular strain)	2.50	22.50
Early Jersey Wakefield (Special strain)	3.00	27.50
Early Jersey Wakefield (Regular strain)	2.50	22.50
Copenhagen Market —Early, about the same season as Charleston Wakefield, round, very compact, large. Various strains of this variety are offered and care should be used	3.00	27.50
Golden Acre —A round headed variety on the Copenhagen Market type, but earlier, maturing about with Jersey Wakefield, but more compact and larger than Jersey. Permits very close planting.....	9.00	87.50

Flat Head Varieties

	Lb.	10 lbs.
Mixson's Early Succession —(Special strain)—Short stemmed, large, compact, it is the best we list with which to follow Charleston Wakefield for Winter or Spring heading	\$3.00	\$27.50
Mixson's Early Succession (Regular strain)	2.50	22.50
All Head Early	2.50	22.50
Early Summer	2.50	22.50
Late Succession	2.50	22.50
Early Short-Stem Flat Dutch (Steins)	2.50	22.50
Late Flat Dutch	2.50	22.50
Sure Head	2.50	22.50
Florida Header	2.50	22.50
Chinese Cabbage—PeTsai	2.50	22.50

All Varieties, 10c per Packet; 30c per Ounce Except Golden Acre Which Is 15c per Packet, 90c per Ounce

CAULIFLOWER

	¼ lb.	Lb.
Early Snowball —The standard variety. Our stock is imported and especially selected	\$7.00	\$25.00
Mixson's Dry Weather	7.00	25.00
Extra Early Erfurt	7.00	25.00

Packets of Cauliflower, 10c; Ounces, \$2.25

CARROT

	Lb.	10 lbs
Chantenay —Half long or stump-rooted, six inches long at proper shipping stage. Broad at the neck, tapering to a blunt point	\$1.00	\$9.00
Danvers Half Long	1.00	9.00
Pride of France	1.00	9.00
Oxheart	1.00	9.00
Long Orange Improved	1.00	9.00

On All Varieties, Packets, 5c; Ounces, 15c.

Mixson's Early Succession Cabbage

Country Gentleman Corn

GARDEN CORN

Varieties marked (S) are strictly sweet or sugar varieties. The others are very early field sorts of good quality, and which are extensively used for the table. Varieties are arranged in the order of maturity.

	Lb.	10 Lbs.	100 Lbs.

Carolina Bradford75	6.50
Florida Favorite75	6.50
Packet, 5c; Ounce, 10c.		

MIXSON'S SELECTED SEED POTATOES

Grown in Maine from the very best selected seed stock, in sections best suited to their proper production, rigidly inspected and rogued while growing, carefully isolated to prevent mixture, painstakingly harvested and stored, then after all this, closely inspected on their arrival in Charleston,—our Seed Potatoes represent stock as near perfection as it is humanly possible to get them.

Cheaper Potatoes can, of course, be gotten, but we are certain that any difference in price of the seed will be seen in difference in the crop. The best proof of the value of our Seed Potatoes is the many truck farmers who buy them from us every year, in large quantities, in the face of lower quotations.

IRISH COBBLER

The standard white Potato for shipping. Early, round, with deep set eyes and a well developed eye-lid. Peck, \$1.45; bushel, \$5.00; sack of 10 pecks, \$11.00.

EARLY NORTHER ROSE

Our own introduction and the best strain of Rose. Maturing right after Cobbler. Longish, slightly flattened, rose color, very heavy yielder, standing extremes of weather during growing period. Larger bush than Cobbler. Peck, \$1.45; bushel, \$5.00; sack of 10 pecks, \$11.00.

RED BLISS

Very early, round, red skinned variety. Still planted in some sections. Peck, \$1.45; bushel, \$5.00; sack of 10 pecks, \$11.00.

Prices Are F.O.B. Charleston, and Are Subject to Change.

TO LARGE BUYERS—When this Catalog goes to press in December, it is manifestly impossible to name prices on Potatoes that will hold good the entire season. When in the market, therefore, write us, stating quantity wanted, and we will quote. We are large handlers of high grade stock.

Mixson's Earliest of All Tomatoes

TOMATOES

Mixson's Earliest of All—The earliest variety in the whole list. Fruits are purple, solid, medium sized, ripening evenly all over, and unusually free from cracks. In fact, it is unusual to find all these good qualities in so early a variety, because usually when earliness is attained, some desirable feature is lost, but Earliest of All retains them all. This is strictly our own introduction, but it is no longer an experiment as we have been selling this stock for fifteen years, with numerous voluntary testimonials from every Southern state. A tremendous bearer **Ounce, 55c; Pound, \$5.00; 10 lbs., \$47.50**

Selected Globe—Medium early, maturing right after Earliest of All, and an admirable variety for shipping. Purple, globular solid fruits with few seeds, ripening evenly. Plants are sturdy. Our strain is closely selected **Ounce, 45c; Pound, \$4.00; 10 lbs., \$37.50**

Mixson's Blight Proof—A red variety, maturing with Selected Globe, and bred especially to resist blight. Fruits are globular, solid, ripening evenly all over, and it is an excellent shipping variety **Ounce, 65c; Pound, \$6.00; 10 lbs., \$57.50**

Mixson's Select Tomatoes

All of the stocks listed below are selected especially for a critical market garden trade and can be used with full confidence. We use only the latest and most approved strains of each variety, securing them from one of the best Tomato growers who is a specialist in his line. We fully realize the importance of dependable Tomato Seed.

The varieties listed on the preceding page are very popular with Market Gardeners and are very largely used by our Trade. The others are, however, all good varieties, and the stocks we supply are just as dependable.

Field Seed Department

All seed listed in this department is high grade stock, from selected crops, carefully harvested, well cleaned, and put up in strong bags. We have excellent cleaning facilities which enables us to do this well. No charge is made for burlap bags, but in the case of Clovers and some high priced Grasses, cotton seamless bags are used, and these are charged extra and are non-returnable. Quotations on all Field Seeds are very variable and it is impossible to quote prices which will hold good the entire season. These are the prices ruling when this Catalog goes to press, and it is never our policy to change prices needlessly, but some may be necessary. Write or wire us for firm quotations at any time, stating quantity wanted, and we will gladly supply them.

MILLETS, CANE SEED, SUDAN GRASS, ETC.

CYCLONE SEED SOWERS

This sower is guaranteed to distribute seed perfectly evenly, will not throw it in an upward direction against the operator, but directly on the ground. The flow can be regulated and it sows Clover, Alfalfa, Oats, Rye, Wheat, Millet, and in fact all kinds of farm seed which are sown broadcast. It also distributes fertilizer, land plaster, etc. Clover Seed is sown a width of 18 feet; Wheat, 25 feet; Millet, 18 feet, and one operator can sow from 40 to 60 acres a day. This sower is a most valuable thing to have on any farm, and pays for itself over and over again. Price, postpaid.....\$2.25

GRASS SEEDS FOR PERMANENT PASTURES

During the past five years the South has made tremendous strides in providing permanent pastures for stock. Farmers have now realized that the mere fencing in of some waste land and calling it a pasture does not necessarily make it one, but the proper seeding and care must be taken in order to attain the desired results. A combination of several plants is always to be preferred to a single one, as you will get a more balanced ration, and a longer grazing period. Lespedeza, Carpet Grass and Dallis Grass work well in such a combination. Full information can no doubt be obtained from your County Agent or State Agricultural College. We ourselves have several bulletins which we will be glad to send to any one interested.

LESPEDEZA

Furnishes excellent grazing during the summer and early fall. Feeding value is very close to that of Alfalfa. Relished by all stock. In combination, 10 pounds per acre is needed or 25 pounds per acre alone. Per lb., 30c; 10 lb. lots @ 25c. Write for price in larger lots.

CARPET GRASS

A perennial that spreads by creeping stems that root at every joint, forming a dense compact sod. Especially adapted to the sandy soils of the Coastal Plain. Does not have underground roots like Bermuda, and therefore can easily be eradicated. Does not like shade. The more it is trampled, the more it spreads. Per lb., 65c; 10 lb. lots @ 57c. Write for price in larger lots. When sown alone, 10 to 12 pounds per acre is advised, or 6 pounds, alone.

DALLIS GRASS

A very hardy grass, enduring drought and extremes of temperature better than most grasses. Prefer good fertile soil and does not make its best growth in too sandy a soil. It spreads rapidly. 10 pounds of seed is needed for an acre alone, or 5 pounds in combination. Per lb., 50c; 25 lb. lots @ 47c. Write for price on larger lots.

The standard inoculation for all Legumes. Comes in the jelly form, with millions of live bacteria, with the patented ventilated stopper. For Peas, Beans, Alfalfa, Clovers, Vetches, Lespedeza, Cow Peas, Soy Beans, Peanuts, etc. Be sure you state for what crop

you want your culture. All Legumes should by all means be inoculated before they are planted. The difference between an inoculated field and one that has not been inoculated will be seen in the quicker

start it gets, growing off faster, maturing more evenly, and what is not so apparent, in the increased number of nodules on the roots. 1 Acre, \$1.00. 3 Acres, \$2.50. 12 Acres, \$9.00.

HUMOGERM Some farmers like to apply inoculation in soil culture, and Humogerm is the very best of these. Each culture is guaranteed for a year, and as you can see, the cost per acre is practically nothing. Comes in bushel sizes, enough for a bushel of seed being in each can. Please state crop you want it for. 1 Bushel Can \$1.00

MIXSON'S SUPERIOR STRAINS OF PEDIGREED COTTON

For many years we have specialized on superior strains of pedigreed Cotton. In fact we have a separate department in our organization which was put in operation ten years ago solely to handle the production and distribution of our pedigreed Cotton Seed. To begin with good seed is the backbone of any crop. To start your year's work by planting inferior Cotton Seed is suicide as low quality seed is not productive. It will not produce a full yield and the the lint will not be uniform and naturally will not bring the market value which you should receive for your staple. We have our Cotton Seed production under the management of a man of years of experience in his line. He sees that our growers plant only high grade stock seeds, that the crops are rogued so that only plants which are true to type are left to produce planting seed, that the crop is ginned, on private ginneries where only one variety is ginned, that only the middle crop is saved for seed purposes and that after ginning the seed are properly cared for and packed. All of this is in the interest of supplying our patrons with seed which will produce bumper crops and more profit per acre.

Our customers are numbered by the thousands residing in every Cotton growing State of the Union and in foreign countries. We have the right seed, our prices are right, and we have the facilities for handling your orders quickly and efficiently. To those who have been our customers we solicit a continuance of your patronage and we also will appreciate the inquiries and orders of all others who may be interested in HIGH GRADE COTTON SEED.

Special Quotations to Dealers and Large Buyers

Advise Number of Bushels of Each Variety Wanted and We Will Quote Accordingly

If you want more information about Cotton Seed, write for our complete Cotton Seed Catalog, which gives a full description of all varieties which we list. **Our Cotton Seed are all sacked in new 2½ bushel Bags under our trade mark. Our terms are cash with order, or sight draft bill of lading attached. Address all inquiries and orders in care of our Cotton Seed Department, where they will receive special attention.** Place your orders early as our stocks of high grade seed is limited. In the past we have been forced to refuse many orders on account of not having enough Seed—so do not delay.

Mixson's Eureka Corn

FIELD CORN

All Varieties Are From Extra Well Selected Stocks, Well Cleaned and Will Give Good Results to the Most Critical Trade.

	Pk.	Bu.
Mixson's Eureka —Exclusively our own introduction and the best all around Corn for planting in the South. It is extra well bred, close selections being made and in the years that we have sold it, we have heard nothing but praise. It averages two good ears, twenty to twenty-two rows, grains pointed with very little "lost motion" between the rows. Is harder than the average, and shuck comes well over the tip. White grain and cob.....	\$ 1.20	\$ 4.25
Mixson's 10% Cob —Three to six ears, small pointed grains, with a heavy percentage of grain to cob.....	1.15	4.00
Batt's Four Ear —Two ears, small pointed grains, compactly set on a white cob.....	1.15	4.00
Marlboro Prolific —Averages two ears, good quality white grain on white cob	1.15	4.00
Hickory King —Very broad, flat, white grains, very small white cob.....	1.00	3.50
Tennessee Red Cob —Large single eared white variety on a red cob.....	1.10	3.50
Whatley's Prolific —Very compact, two eared, small grained, red cob.....	1.15	4.00
Mosby's Prolific —Two eared, pointed white grains on a white cob. Medium early	1.10	3.50
Six Ear Prolific —From four to seven ears, heavy, small pointed white grains on white cob.....	1.15	4.00
Improved Early White Dent —Very early, one to two ears, white cob. Recommended where earliness is desired.....	.90	3.25
Improved Early Golden Dent —Very early, same general characteristics as White Dent, but preferred by many.....	.90	3.25

TO LARGE BUYERS—In 5 and 10 bushel lots it may be that we will be able to quote somewhat lower prices. We suggest, therefore, that when you are ready to buy you ask us for prices, stating quantity wanted, or if you wish, order at these prices, and we will give you the advantage of any difference that we can.

INSECTICIDES, FUNGICIDES, SPRAY MATERIALS, ETC.

Arsenate of Lead (Dry Powdered) For Potato Bugs, Tobacco Worms, and all other leaf eating insects. Apply either dry or in spray at the rate of two pounds per acre per application. 1 Lb., 30c; 4 Lbs., @ 27c; 8 Lbs., @ 25c; 48 Lbs., @ 22c; 100 Lbs., @ 20c.

Calcium Arsenate (Dry Powdered) For Boll Weevil, and all leaf eating insects. 25 Lbs., @ 14c; 100 Lbs., @ 12c.

Bordeaux Mixture—For Blight control on Potatoes, etc. Ours is in the dry form and can therefore be applied either dry or in spray at the rate of 4 Lbs. to the acre per application. Lb., 30c; 5 Lbs., @ 26c; 25 Lbs., @ 22c; 100 Lbs., @ 20c.

Nicoteen Dust—For control of Aphis, Lice, or all other sucking insects. Apply dry at the rate of 20 Lbs. per acre, only on a clear day. 25 Lbs., @ 22c; 50 Lbs., @ 20c; 100 Lbs., @ 19c.

Black Leaf 40 (Nicoteen Sulphate) Does the same work as Nicoteen Dust and is applied in spray under pressure. 1 pound makes from 100 to 125 gallons. 1 oz. 35c; ½ Lb., \$1.25; 2 Lbs., \$3.50; 10 Lbs., \$13.50.

Dry Lime Sulphur For a dormant or winter spray use 12 pounds to 50 gallons of water. For summer spraying use 2½ pounds to the same amount of water. If you wish Arsenate of Lead can be added. For San Jose Scale, Oyster Shell Scale, etc. Lb., 30c; 5 Lbs., @ 27c; 100 Lbs., @ 20c.

SPRAY PUMPS

Auto Spray No. 1-D—Works by means of compressed air; continuous spray with cut off at nozzle. Holds 3½ gallons. Made from heavy galvanized steel. Each.....\$7.00

Auto Spray No. 22—Heavy tin, holds one quart,—strongly made. Each.....60c

Triumph Hand Dry Dusters

The best machine of its kind for the application of any powdered Insecticide or Fungicide. Strongly constructed, every working part made of wrought steel, and all parts on which wear might occur are from hardened steel. Ball bearings are used. Packed in individual cases. Price.....\$8.00

TO LARGE BUYERS—If in the market for larger quantities than those quoted, Write us stating quantity wanted, as it may be that we can quote special prices.

About Parcel Post Shipments—Poisons are debarred from the mails. This includes Arsenate of Lead and Calcium Arsenate, which must go by Express or Freight. If any items on this page are ordered by Parcel Post, remember to include the amount of postage.
